

**SPECIFICATION AMENDMENTS**

Amend the Title as follows:

**WALL OR DOOR ELEMENT, PROVIDED WITH SECURING MEMBER PREVENTING  
CASTORS AGAINST LIFTING OFF FROM RUNNERS**

Amend the Abstract as follows:

A door element or wall element having lower castors (12) which are movable on a runner (13) is equipped in the region of the castors (12) with a securing member (28) having securing hooks (31, 32) and which, by entry of the securing hooks (31, 32) into the runner (13), prevents the castors (12) from undesirably lifting off from the runner (13). The securing member (28), which is designed as a simple plastic part, is mounted movably, namely rotatably, on a castor axle (23) of the castor.
